Inspection Experts, Inc.

IEI Your IT Services Partner

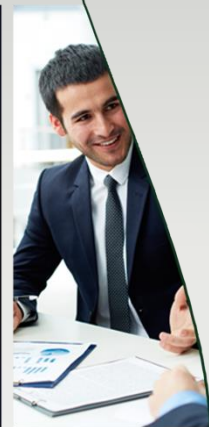

January 23 2015

The logo for Inspection Experts, Inc. (IEI) is displayed in white, bold, serif font on a dark green background.

Inspection Experts, Inc.

About Us

- We are an IT Services Provider that has successfully developed and deployed multiple projects in North America, UK and Australia
- We can support complete software development process – from planning, requirements, implementation, testing and deployment
- We can support staff augmentation requirements to help you achieve your business goals
- At director level, individuals have 20+ years of experience in various IT domains and in North American and UK environments

The logo for IEI Inspection Experts, Inc. features the letters 'IEI' in a large, bold, white serif font on a dark green background. Below the letters, the full name 'Inspection Experts, Inc.' is written in a smaller, white sans-serif font.

Inspection Experts, Inc.

Why Us

- We **listen** – user acceptance is critical for final project success
- We value **partnership** – working together makes it easier to complete projects.
- We are **transparent** – we tell it as it is and share risks, issues and clear blockers to move projects ahead.
- We **believe** in an iterative approach – getting feedback earlier is better. De-risk early, use mockups and POCs effectively
- We are '**agile**' – hard to get all requirements correct the first time. We are open to reasonable changes

Our Delivery Process

- **Initiation and planning:** Ability to gather your requirements efficiently to allow selection of best technology and process
- **Implementation:**
 - > Rapidly staff resources in the chosen technology to deliver on time
 - > Rigorous Quality Control to create a quality product
 - > Project Management to ensure on time, within cost product that meets your quality expectations
 - > Iterative, Agile/Scrum, development processes to support rapid turn around

TimeExPro

Problem

1. High costs related to paper-based timesheet and expense processing
2. Administrative Burden for Employees.
3. Tracking and Processing delays

Solution

1. Flexible billing and payroll reporting
2. Improved productivity
3. Zero infrastructure cloud based

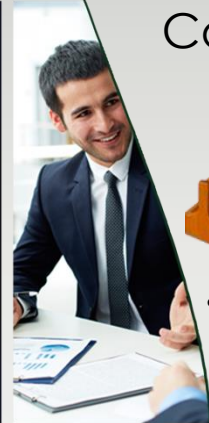

Custom Application Development

Problem

1. More than 500 users
2. Millions of documents in multiple databases
3. Multiple systems with expensive licenses
4. Result: High Operations Costs

Solution

1. One App
2. License free
3. 500 users search multiple documents on multiple systems using the app

- 97% read only users

- 3% read and write users

Case study:
Engineering plant to cut costs want to reduce license usage by providing one document search application

WE LISTEN

WE VALUE PARTNERSHIP

WE ARE FLEXIBLE

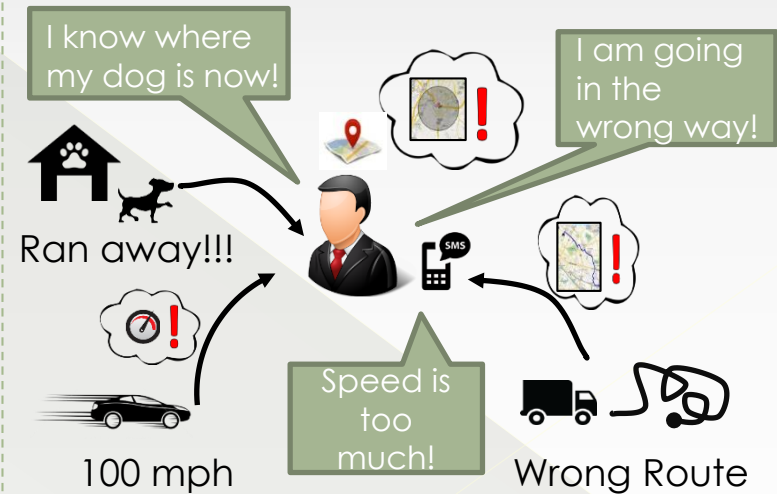

Tracking App

Problem

Manager does not know where his crew/vehicles/delivery are?

Solution

1. Real time tracking
2. SMS/Email alerts
3. Intelligent reports
4. Mobile/Android/ iOS support
